

# Increase Your Profits, Not Your Headcount, with AI Automated Penetration Testing

### About

As a security services provider, you face a constant battle to adapt to and train your experts to deal with new threats, a difficult, and costly process. Most of the work must be done manually, owing to the limitations of the AST automation technologies, that lag behind the necessary adaptations. This manual necessity is the biggest bottleneck for penetration testing today.

NexPT is an award-winning SaaS Application Penetration Testing platform, automating the scanning and detection of both known and unknown security vulnerabilities in applications and web services.

The NexPT platform is powered by NeuraLegion's revolutionary AIAST® technology, which includes industry leading DAST and AI Fuzzing solutions, making your job as a Penetration Tester easier, faster and more profitable.

In addition to providing the most comprehensive automation for vulnerability detection in Web Applications, APIs, Mobile Applications and Microservices-based Applications, NexPT brings an immediate ROI, automating 95% of vulnerability detection that is currently performed manually, as well as saving time with immediate, false-positive free, fully customizable reports.

## Harness the Power of AI Automation to Make Your PenTesters 10x More Productive!

### Benefits

- Let our AI powered AST work for you, replacing the need for manual testing
- Full coverage of Dynamic Web Apps, APIs, Mobile Apps and Microservices-based Apps
- Say goodbye to unnecessary costs with our SaaS pay-per-use pricing models
- Help your clients stay compliant, with Dynamic Application Security Testing for OWASP Top 10+
- Detect Oday & Business Logic vulnerabilities
- Easily generate white-labeled, customizable, rebrandable, false-positive free reports

**VULNERABILITY TABLE**

#	Vulnerability	Discovered	Status	Severity
1	Local File Inclusion	29 of April 2019, 01:15 AM	Unresolved	H
2	OS Command Injection	28 of April 2019, 11:44 PM	Unresolved	H
3	Reflective Cross-site scripting (XSS)	29 of April 2019, 09:03 AM	Resolved	H
4	Reflective Cross-site scripting (XSS)	29 of April 2019, 07:44 AM	Unresolved	H
5	Reflective Cross-site scripting (XSS)	29 of April 2019, 07:44 AM	Unresolved	H
6	Reflective Cross-site scripting (XSS)	29 of April 2019, 02:24 AM	Unresolved	H
7	SQL Injection	29 of April 2019, 01:17 AM	Unresolved	H
8	SQL Injection	28 of April 2019, 11:42 PM	Unresolved	H

**COMPLIANCE RESULTS - OWASP**

Vulnerability	Severity	Status
Authentication Bypass	High	Pass
Buffer Overflow	High	Pass
LDAP Injection	High	Pass
Local File Inclusion	High	Fail
NoSQL Injection	High	Pass
OS Command Injection	High	Fail
Persistent Cross-site scripting (XSS)	High	Pass
Reflective Cross-site scripting (XSS)	High	Pass
Remote File Inclusion	High	Pass
SQL Injection	High	Fail
SQL Injection: Blind Boolean Based	High	Fail
SQL Injection: Blind Time Based	High	Pass
SSTI - Server Side Template Injection	High	Pass
Stack Overflow	High	Pass
Unrestricted File Upload	High	Fail
XML External Entity (XXE)	High	Pass
XPATH Injection	High	Pass
Backup Location	Medium	Pass

AIAST®

Fully scan dynamic apps

OWASP Top 10 and more

Odays & Business Logic

Customizable re-brandable reports

## A New Generation Application Penetration Testing Platform

### Key Features

#### ► Easy to Use

NexPT is a cloud based platform, requiring no costly integration, training or complex configuration by experienced security staff. Simply Log-in ► Upload ► Scan! Empower even your junior PenTesters to produce high quality results, immediately!

#### ► NO False Positives

Due to its active nature, AIAST® is a completely False Positive FREE technology. Only validated, exploitable vulnerabilities are reported, eliminating the need to recheck and filter every scan report. Saving your PenTesters costly, precious time!

#### ► Immediate Customizable Reports

Easily white-label, re-brand and re-configure reports, generating technical, executive and compliance reports automatically, saving hours of manual report writing. Free validation of remediated vulnerabilities with a single click to produce updated reports, without the need to rescan.

#### ► Comprehensive and superior testing

Our award winning AIAST® technology, provides you with the most comprehensive AST automation on the market, able to detect the OWASP Top 10, MITRE Top 25, Business-Logic and Oday vulnerabilities. Comprehensive testing automation, on par with a team of human ethical hackers, at your fingertips!

#### ► Unprecedented Coverage

The AIAST® technology delivers the ONLY automated solutions on the market capable of fully testing Dynamic Web Apps, APIs, Mobile and Microservices-based Apps. Start using Application Security Testing solutions that are RELEVANT for today's technologies!

#### ► Increase ROI and Business Scalability

Automate 95% of application penetration testing and focus on growing your business, not your team. What our AIAST® solutions can do in one hour would typically require 10 hours of an experienced PenTester.

Scale your business and profits 10x times faster with NexPT!

## The only Solution to provide Full Testing Coverage of Modern Technologies

Dynamic Web Apps

WebSocket based Apps

Mobile Apps

APIs

Microservices based Apps

### Enhance your services with Security Testing Automation!

Whether you are looking to set up a penetration testing practise, or to scale up your current operations, NexPT delivers immediate automation of AppSec testing.

Integrate a single unified PT platform to enhance your services with immediate automated AppSec testing, at scale. Establish a high growth, profitable and differentiated business with attractive margins and benefits, delivering outstanding ROI.

#### TESTIMONIAL BY EXPIM

"As a cloud service provider, it is our responsibility to deliver stable, secure web applications to our customers. With NexPT, we managed to reduce costs and increase productivity at the same time. Not only that, but we were able to evolve as a business and generate additional revenue streams by offering our customers PT services, which we were not focussing on before. NexPT made it easy, and profitable, for us to enhance our services portfolio."

Ofir Hadad, CEO of Expim
